Beauty & Skin Care

Experts agree that good skin care requires a long-lasting beauty plan and following a few simple general health rules: **Avoid ...** sunlight on unprotected skin, excess sweets, and fatty foods. **Use ...** sunscreen, moisturizer, and cleansers. **Get ...** regular exercise and drink plenty of water. **Test ...** any new skin or makeup products on patches of your skin if you have any known (or unknown) allergies. [These products were tested by our editors for this issue and were chosen based on ease of application, effectiveness, longevity, and skin sensitivity.]

1. Clinique All About Shadow Quad
